

Jayakrishnaji Indraji Thakar Botanical Garden

Government Science College, Sector-15, Gandhinagar

December-2024

The Convention on biological diversity (CBD) defined genetic materials as “genetic material of actual or potential value (CBD 1992, article 2), in which plant genetic resources (PGR) represents the plants or plant parts with their actual or potential value (FAO-PGR). Such PGR classified into eight major groups according to the respective conditions for use and conservation (Keller et al. 2002): Agriculture crops, pasture plants, vegetables, fruit crops, special crops (Medicinal, aromatic, spices, dye etc. plants), ornamental plants, forest plants and wild plants. Besides of this, it was estimated that around 60,000 plant species in the world are facing the severe threats of extinction. Such important PGR seeks immediate conservation measurement and, in this connection, CBD put greater emphasis on ex-situ and in-situ conservation. They also emphasize the development of garden like herbal garden for the conservation and awareness on the medicinally important flora while botanical gardens for the overall conservation of the PGR under the supervision of experts. Such botanical garden serves various purposes like provide platform for the display of regional floral diversity, scientific research, conservation and education. It was also reported that the botanical garden also provides the platform for the research on introduction of exotic flora.

Botanical Garden are considered as main centers of conservation of Plant genetic resources from their extinction and following are the major roles of botanical garden.

- Botanic Gardens are taken as main centers of conservation of plant genetic resources from their extinction.
- To serve as a living repository of plants of a country and also of selected exotic species.
- To serve as a "safe abode" for the rare and endemic plants.
- To house the germplasm collection of selected economic, ornamental and medicinal plants and their wild progenitors.
- To promote educational programmes and research in experimental botany and ornamental horticulture.
- To undertake research in propagation of rare and threatened species and species for afforestation, energy and alternative or substitute food and fodder plants. Species of different climatic condition are to be grown in specialized conservation houses such as greenhouses etc.
- To generate awareness about value of trees and about curious, beautiful and interesting plants with delightful landscaping and display.
- To organize flower, foliage and plant shows, exchange of viable seed materials, seedlings, saplings and other propagules
- To introduce economic and economically exploitable species to, accommodate and study the physiology of species for field trials and cultivation.

- To act as data bank for information and documentation on holdings in botanic gardens of the country or region.
- To establish a seed gene bank especially for wild species

Mission

- Providing living plant genetic resources for academic and research purpose including special emphasis on its ex-situ conservation.

Goals:

- Serve as repository of living plant specimens especially for the flora of Dry deciduous forest of Gujarat
- Promote ex-situ conservation of Rare and Threatened plant species
- Maintain the live collection of plant for Research, Educational and aesthetic purposes.
- Serve as seed bank for conservation significant plants and enable awareness among all the students/researcher and general peoples on importance of Plants

Focusing on the above-mentioned Mission and Goals, The Government Science College, Gandhinagar established Botanical Garden in 1970 which was earlier maintained by Horticulture department, Government of Gujarat. Since the inception garden serves as live repository of the plants used by students of Botany subject. The Events motivation general peoples

on the conservation and preservation of biological resources such as Environment Day, Wildlife week, Ozon day and special plantation drives are carried out every year. In such event not only Botany subject student and faculties but all the departments of the college are getting participated. Apart from this, Forest department, State Medicinal Plant Board, Various Banks, Rotary clubs etc. are also join such plantation drive. Such activities are carried out across the college campus including botanical garden

(fig.1)

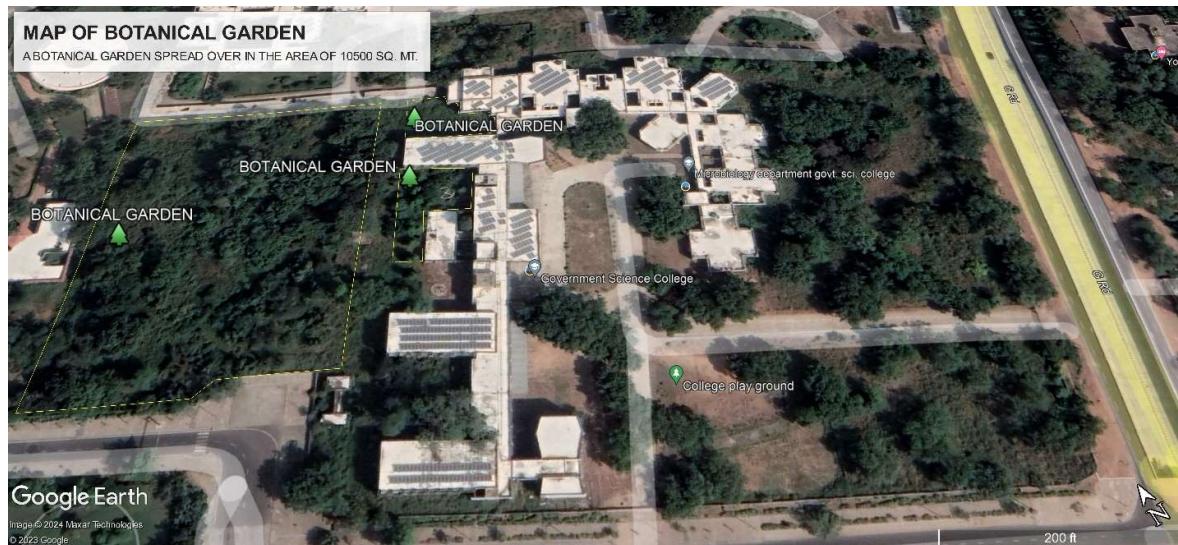

Figure 1: map showing the location of Botanical Garden in the College campus

The total area of botanical garden is 10500 sq. mt. The college campus is very rich in floral diversity i.e. a total of 374 angiosperms, 06 Gymnosperms and 06 species of cryptogams are preserved in the campus. Among the

total 404 Angiosperm species, 47 are climber/twiner, 30 cacti, 23 grass, 159 herb, 57 shrubs, 11 small tree and 77 tree.

Division	Habit	No. of Habit Species
Cryptogams	Bryophyta	01
	Pteridophyte	05
Gymnosperms	Shrub/Straggling shrub	06
Angiosperms	Climber	47
	Cactus	30+
	Grass	23
	Herb	159
	Shrub	57
	Small Tree	11
	Tree	82
Total No. of Species		421

Presently the garden is under renovation undertaking by Road and building department of state government. The proposed plan for the development is as follow:

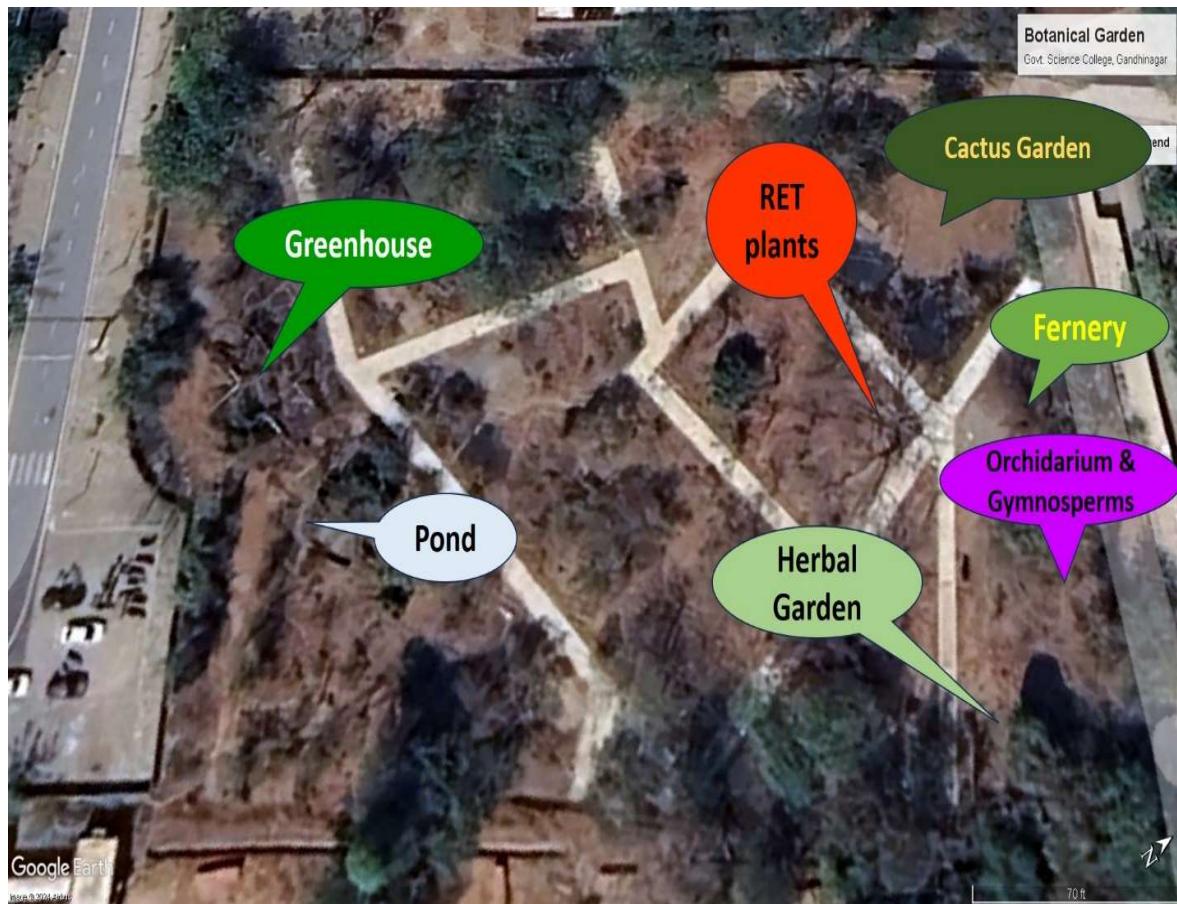

Figure 2: Proposed layout of the Botanical Garden re-development

**Annexure: 1 A checklist of the floristic diversity in Government Science
College, Gandhinagar.**

Sr. NO.	Botanical Name	Local Name	Family
1	<i>Clematis</i> sp.		Ranunculaceae
2	<i>Annona reticulata</i>	Ramfal	Annonaceae
3	<i>Annona squamosa</i> L.	Sitafal	Annonaceae
4	<i>Polyalthia longifolia</i>	Asopalav	Annonaceae
5	<i>Cissampelos pareira</i> L.	Venivel	Menispermaceae
6	<i>Cocculus hirsutus</i>	Vevdi	Menispermaceae
7	<i>Stephnia japonica</i>		Menispermaceae
8	<i>Tinospora cordifolia</i>	Gulvel	Menispermaceae
9	<i>Nelumbo nucifera</i>		Nymphaeaceae
10	<i>Nymphaea pubescens</i>		Nymphaeaceae

Sr. NO.	Botanical Name	Local Name	Family
11	<i>Nymphaea</i> sp		Nymphaeaceae
12	<i>Nymphaea</i> sp.	Kamal	Nymphaeaceae
13	<i>Argemone maxicana</i>	Darudi	Papavraceae
14	<i>Cardamine trichocarpa</i>		Brassicaceae
15	<i>Capparis decidua</i>	Kerdo	Capparaceae
